More so, this design is probably designed this way to make the app as resource efficient as possible, which is a great departure from the tendency of similar professional-grade tools which have a great impact on your system's resources, especially if your system is also a bit dated. Use your keyboard as the synthesizer's keys Playing something is done as simple as writing your typical message since each key represents a different tone and semitone from your synthesizer's keyboard. More so, you can play alone, play with any MIDI or MIDI-Karaoke accompaniment, and sing into a microphone at the same time. A synthesizer for both beginners and professionals alike If you're a starter, you can use this a tool to play live music on a computer without buying a separate electronic musical instrument,
