The first versions of AutoCAD were expensive, and were popular with mechanical engineers, architects and others who made large-scale drawings for their clients. Today, AutoCAD is widely used for 2D drafting and 3D modeling in industrial, mechanical, architectural and construction industries, as well as civil engineering, architecture and landscape architecture. AutoCAD is currently available in version 2018. Note: This review focuses on the latest version of AutoCAD, which is 2018, and on the Mac, as well as Linux. Installation Since AutoCAD is a commercial software application, installation requires registration. AutoCAD is available as a full installation or as a set of four individual packages: DWG & DXF, Drafting, Architectural and Landscape. The additional programs include Alias®, ArchiCAD®, Dimension, HVAC, ACIS, Field & Stream, MeasureIt!, Network, Office & System Center, Parametric Design, PLM Workbench, Project and 3D Warehouse. The DWG & DXF package includes the full installation. The Architectural package includes the drafting and DWG & DXF packages. It is important to point out that these packages are not separate downloads. It is recommended to install all four packages together. Note: This review focuses on the installation of the 2018 packages. The version of AutoCAD 2018 is a full installation, and not the individual packages. AutoCAD is compatible with most Macs, but not all Macs are fully supported. The Mac version of AutoCAD is currently (April 2018) available for the following Macs: Mac Mini — 2014 — 2014 Mac Pro — 2013 — 2013 Mac Pro — 2014 — 2014 MacBook Air — 2014 — 2014 MacBook Pro — 2013 — 2013 MacBook Pro — 2014 — 2014 MacBook Pro — 2015 — 2015 MacBook Pro — 2016 — 2016 MacBook Pro — 2017 — 2017 MacBook Pro — 2018 — 2018 Mac Mini — 2014 The Mac versions of AutoCAD are available for download directly from the Autodesk website. System requirements Mac OS X v 10.6.8 or later Mac OS X v 10.7 or later 1 GB of RAM CD-ROM drive 16 GB of free disk space The minimum recommended version of AutoCAD for Mac OS

Map editing The AutoCAD Cracked 2022 Latest Version 2010 application also allows for editing of vector map data. The data editing is similar to the previous version of AutoCAD Crack Mac. Several tools for vector editing are available, including moving, rotating, scaling, text, linetypes, hatches, curves and surfaces. Like the previous AutoCAD version, an application is available for mobile devices. The application can work with two-dimensional maps for editing and viewing. AutoCAD VR is an application that allows editing of 3D maps, using the AutoCAD VR Editor add-on. AutoCAD VR is compatible with some of the CAD Software's including AutoCAD LT and AutoCAD Map 3D. This application enables the creation, viewing, edition, and export of geometry. Autodesk offered AutoCAD Map 3D as a stand-alone product, an add-on product to AutoCAD LT or a module in AutoCAD Map. Version 4.1 introduced the AutoCAD Map 3D Design Studio (formerly known as AutoCAD Map Design Studio), a web-based application for users to create, view and edit 3D maps. The Design Studio is a plug-in to Microsoft Internet Explorer and can work in conjunction with Internet Explorer in Windows 7 or 8. AutoCAD Map 3D Design Studio also offers an Android and iOS App Store. AutoCAD Map 3D Design Studio is available for free on its website as a web-based application or through the mobile App Store for Android or iOS. AutoCAD Map 3D Design Studio allows users to create, view, edit, and export 2D and 3D maps. A table of contents is available on the left side of the application allowing users to quickly navigate the map. Users are able to view, measure, navigate, edit, and print maps. AutoCAD Map 3D Design Studio is designed for the construction industry. Designers can use design tools to create, edit, and visualize 2D and 3D maps. Users can use the built in measuring tool to make initial sketch calculations. Designers can also use the Sketch Component, AutoCAD Map 3D Design Studio's extensible tool, to create and edit 2D and 3D components and use 3D printers to print a map. The Design Studio also features 3D Modeler, a tool for creating a drawing from scratch. Designers can import and export 2D and 3D geometry and a1d647c40b

To activate the keygen, right-click the desktop icon to open the Properties window. On the General tab, change the Product key for Autodesk Autocad from "0000000000000000" to your unique product key. What's New In?

Automatic presentation of drawings in pages: You can share your drawing on a separate page, even if your current drawing page is not large enough. (video: 1:14 min.) Quick Access: Click a command for instant access, then switch to a different view, and the command is ready for use again. (video: 1:27 min.) New commands for history and tags: New commands let you create, copy, and delete history and tags from the command line or from the Tags and History dialog box. New command-line history manager: The command-line history manager makes it easy to view, copy, and delete commands from the command line. Extensible CAM: Introducing CAM, or Coordinate and Automatic Measure. In AutoCAD LT, you can draw lines based on a coordinate system, and AutoCAD will automatically calculate and add dimensions. AutoCAD LT: CAM provides the same capabilities in AutoCAD LT. (video: 1:22 min.) New Viewports: You can view plans, sections, or exploded views. (video: 1:20 min.) New Sheet Views: Create sheets for the following views: The view of the entire drawing area from an origin point, Sheet Views for different views, Page Views, Reference Views, and Sheet Views for specific layers. The system is still in preview mode. To ensure the most up-to-date information, please contact Autodesk support. More than a century of tradition, innovation and dedication. To enable better design.Q: Nested loop in Excel VBA array I have a list of dates in a column and corresponding values in a column next to it. What I want is to loop through the dates and match each value with a date and then compute an average. So in the example below, if I enter '14/2/2011' and '14/4/2011' for my dates and 7.25 for my values, it should give me an average of 6.5. I wrote a nested loop to iterate through the dates
