Part numbers: Only the US-based companies have used the DXF format. The European companies have used DWG, which supports a similar format. Beyond CAD: AutoCAD has offered a range of business software tools, including non-CAD applications. These include applications based on PostScript, a drawing and graphic page description language and named after the standard developed in the 1980s; a CAD-specific manufacturing software for the manufacture of objects such as molds and patterns. The former were discontinued and the latter was sold to Microchip Technology, who rebranded it as Carbide 3D. The following are some of the products AutoCAD has offered which are unrelated to CAD: Function Blocks was a scripting language for use with AutoCAD's function block editor. With the introduction of AutoCAD LT, Function Blocks was available to all AutoCAD users. NarrowWorks, originally developed by PTC, a Canadian company, was an operating system for CAD that was intended for the use of CAD in the workplace. NarrowWorks was discontinued in 1998. The OS supported many CAD applications, including AutoCAD. Strategic Visuals developed a graphics API for AutoCAD called XYZ Technologies ObjectARX. It was eventually supplanted by ObjectARX. C++ was one of the supported languages for ObjectARX. It was first introduced in AutoCAD 2016. Visual LISP is a native language used in AutoCAD and is one of its original native languages. Visual LISP is used for code-behind coding (programmatic actions), while the newly introduced ObjectARX is used for automation. Enterprise: AutoCAD Architecture and AutoCAD Civil 3D. These are AutoCAD-based desktop products designed for the architecture and civil engineering market. AutoCAD Electrical is an extension of AutoCAD, designed for the electrical engineering industry. AutoCAD LT is a lightweight version of AutoCAD. It lacks some features, such as G-code support, but has greater memory efficiency. It can be used instead of the standard AutoCAD when power and memory are limited. AutoCAD 360 Suite, formerly Autodesk 360, is a suite of components for AutoCAD and MicroStation. AutoCAD Video is a video editor application. It was discontinued in May 2015. InVision is a web-based application that offers a range of features in CAD related software, and was announced a1d647c40b
